KNIGHTS TEMPLAR FLOWERS. Elegant Designs Will be Seen in Beston's Public Garden - The Program For the Four Days' Celebration-The Connecticut

Boston, Aug. 5.-When the Knights Templar assemble in grand conclave August 27 they will find on the public floral designs. During the recent Chrislian Endeavor convention many were he compliments bestowed upon the fine work of the gardeners, but the designs which are now being arranged will outdo them for beauty, if not for ingenui-

In making these designs it is the purpose of the gardeners to have them folthe brewery, under the super- low closely the badges and emblems of the Masonic fraternity, even including the colors. Six new designs will be laid out, but in all there will be about twenty, as many of those used recently can be changed by using Masonic letters and this Lager appears to be better adapted to and mottoes in place of those now to be

> Two of the new designs represent Maiese crosses with other emblems placed in the corners, and in the center of each an immense paim tree. In size they are 15x15 feet. Near the Washington monument is to be a design of the badge of the grand commandery of Massachu-setts and Rhode Island, and at about the same distance from the monument on the south side there has already been laid out a design of the badge adopted in honor of the twenty-sixth conclave. They are 22x14 feet in size, and after they have been clipped two or three times will be the finest ever seen in the garden.

> On the south side of the circular plot which surrounds the monument is a handsome cross, filled in with other designs, which will be slightly changed, and on the east side of the plot will be the badge of the Bastern Star.

> On the north side will be an immense Cemplars' cross, with cross and crown n the center. Just what the design for he west side will be has not been fully decided. The mottees and letters now to be seen on the arches over the bridge will be removed and Masonic mottoss substituted. Festoons of flowers will

cover the remainder of the arches. Designs other than those already enunerated may be made; but the foregong outlines substantially the projects of the department.
